EDUCATION	<b>University of Illinois at Urbana-Champaign (UIUC), USA</b> <i>Master of Science, Mechanical Sciences and Engineering</i>	<b>GPA: 4.00/4.00</b> 2016 - 2018 (Tentative)
	<b>Indian Institute of Technology Madras (IITM), India</b> <i>Bachelor of Technology (Honours), Mechanical Engineering</i>	<b>Cumulative GPA: 9.67/10.00</b> 2012 - 2016
RESEARCH INTERESTS	Fluid physics, Numerical Fluid Dynamics, Numerical Algorithms, High Performance and Parallel Computing, Flow and Instability Control, Aeroacoustics	
PUBLICATIONS	<b>Tejaswin Parthasarathy</b> and <b>Mattia Gazzola</b> . "Scaling arguments for flows induced by oscillating cylinders", 70 <sup>th</sup> Annual Meeting of the APS Division of Fluid Dynamics, Denver, USA <a href="#">Talk</a>	
	<b>Mattia Gazzola</b> and <b>Tejaswin Parthasarathy</b> . "Viscous streaming for locomotion and transport", 70 <sup>th</sup> Annual Meeting of the APS Division of Fluid Dynamics, Denver, USA <a href="#">Talk</a>	
	<b>Das, Shyama Prasad</b> , and <b>Tejaswin Parthasarathy</b> . "Effect of parameters on controlled flow using synthetic jet." International Journal of Fluid Mechanics Research. <a href="#">Jou.</a>	
	<b>Parthasarathy, Tejaswin</b> and <b>S. P. Das</b> . "Some aspects of flow control over a NACA0015 airfoil using synthetic jets." Journal of Physics: Conference Series. Vol. 822. No. 1. IOP Publishing, 2017. ( <a href="#">15<sup>th</sup> Asian Congress of Fluid Mechanics</a> ) <a href="#">Conf.</a>	
	<b>Parthasarathy, Tejaswin</b> , <b>Vignesh Srinivasaragavan</b> , and <b>Soundarapandian Santhanakrishnan</b> . "ADAMS-MATLAB Co-Simulation of A Serial Manipulator." MATEC Web of Conferences. Vol. 95. EDP Sciences, 2017. <a href="#">ICMME 2016</a> <a href="#">Conf.</a>	
AWARDS & ACHIEVEMENTS	Awarded the <b>H.C.Ting Distinguished Fellowship</b> at UIUC for scholastic aptitude [2016]	
	Secured the <b>Z-Wing Award</b> for comprehensive performance across Narmada <sup>1</sup> [2016]	
	Pursued the <b>Honours</b> degree at IITM, completing 3 additional graduate level courses, offered to select meritorious students [2016]	
	Secured the <b>Dr. Vivekanand Kochikar Award</b> and <b>Dr. Dinesh Balagangadhar Prize</b> for excellence in academics in B.Tech. Mechanical Engineering [2015] <a href="#">Ref.</a>	
	Awarded the <b>Nissan Global Foundation Scholarship</b> for comprehensive performance across IITM [2014] <a href="#">Ref.</a>	
	Awarded the <b>KVPY Fellowship &amp; DST-Inspire Fellowship</b> for scientific aptitude [2012]	
	National high-school <b>Olympiad</b> (Astronomy, Physics) finalist [2011]	
SKILLS	<b>Computing:</b> C, C++, Matlab, Python, Bash, $\LaTeX$ <b>Software:</b> Git, Makefiles, SolidWorks, Fluent, MS Excel, Tecplot, ParaView/VTK API, Simulink <b>Other:</b> HPC systems, Parallelism APIs ( <a href="#">OpenMP</a> , <a href="#">TBB</a> , <a href="#">MPI</a> ) & High-Speed Camera Utilization	
RESEARCH PROJECTS	<b>Viscous Streaming - Physics &amp; Applications</b> <i>Advisor : Prof. Mattia Gazzola, MechSE, UIUC</i>	
	Dec '16 - Present	

<sup>1</sup>Residence hall at IITM

- Numerically investigating the fundamental physics of the [viscous streaming](#) (after extensive validation) using fluids, model-order reduction and dynamical systems theory, while simultaneously deriving design principles for broad deployment in micro scale & biological systems
- Leading the group's fluid dynamics research as the primary software & scientific developer of a 2D uniform resolution DNS code, used to investigate a [variety](#) of Fluid-Structure Interaction (FSI) problems
- Enhanced the scalability and performance of the shared memory code by refining data structures, optimizing memory access and localizing operators, improving the time to solution by 40%
- Co-wrote key parts of a NSF career proposal with Prof. Gazzola, exploring ideas for research direction and providing technical content

### Flow Control over aerofoils using Synthetic Jets

Advisor : [Prof. S.P Das](#), HTML, IITM

Jul '15 - Apr '16

- Extensively simulated and validated the cases of uncontrolled flow over an aerofoil, synthetic jets in quiescent media and controlled flow over an aerofoil
- Numerically investigated the effect of parameters on the control of boundary layer using single synthetic jets over 2-D aerofoils, with an emphasis on understanding the flow physics
- Optimized the operational parameters of the aforementioned synthetic jets to achieve performance enhancement and explored the use of quick return mechanisms to control the time of blowing/suction
- Contributed to the fundamental understanding of the effect of synthetic jets as a means of extracting energy from the flow to control/enhance the lift and shedding performance

### Surgical Robot Simulation and Path Planning

Advisor : [Prof. S. Soundarapandian](#), MES, IITM

Dec '14 - Sep '15

- Reverse engineered, modeled and & drafted a path planning algorithm for a defunct robotic arm
- Designed the control software for the aforesaid robotic arm, ensuring precise and accurate path adherence in orthopaedic surgery applications, which was verified by simulating the same in the ADAMS environment, with custom codes for robot activation and feedback control
- Arrived at a final design for retrofitting the arm to meet high degrees of precision and accuracy at affordable costs, with help from [ABB](#), after an iterative design process
- Simultaneously developed a framework for retrofitting obsolete robotic arms for use as an educational aid in robotics labs & courses (for modules such as path planning and trajectory control)

---

## ACADEMIC PROJECTS

### do

Instructor : [Prof. Andreas Kloeckner](#), CS598, UIUC

Aug '17 - Present

-do

### do

Instructor : [Prof. Laxmikant Kale](#), CS484, UIUC

Aug '17 - Present

-do

### 3-D Navier-Stokes Solver for simulation of Atmospheric Phenomena

Instructor : [Prof. Brian Ford Jewett](#), ATMS502, UIUC

Feb '17 - May '17

- Developed a 3-D nonlinear quasi-compressible flow solver using Finite Volume Methods (FVM), grid staggering and Operator splitting, with [OpenMP](#) for parallelism
- Also developed an equivalent version for 2-D with Adaptive Mesh Refinement (AMR) capabilities

### Solutions for Potential Flow past Cylinders

Instructor : [Prof. Arul K Prakash](#), AM5530, IITM

Jul '15 - Nov '15

- Analytically derived solutions for potential flow past multiple cylinders using complex number theory, based on Crowdy's seminal [work](#) & implemented efficient numerical algorithms in MATLAB/Mathematica for solving the system within ~ 30s

Details and additional projects can be [found here](#).
